

AstroSciKu *contest*

This AstroSciKu contest is organised as a collaboration between the X-IFU Consortium, the Athena Community Office, the XMM2Athena project, the WFI Consortium, and the AHEAD2020 project to celebrate the International Day of Women and Girls in Science.

Competition Rules:

- The submission of AstroSciKu starts with this publication and ends on 7 February 2022.
- Participants: everyone can submit their AstroSciKu.
- How to participate: there are two options to participate. The preferred option is to post your AstroSciKu on your personal Twitter including the hashtags **#2022AstroSciKu** **#WomenInScience**. If you don't have a Twitter account, you can send us your AstroScikus to xifu@irap.omp.eu and we will take care of disseminating it on our [Twitter account](#). If this is the case, please include in the email a name or alias for its publication on Twitter.
- Limits: each participant can send a maximum of two AstroSciKu.
- Selection: three AstroSciKu will be selected considering originality, relevance to the topic, and accessibility by the general public. The selection will be done by members of the different teams, will be final, and cannot be reconsidered. The result will be published on 11 February through the project/consortia communication channels. The project will have the right to use the submitted AstroSciKu for its communication activities.
- Prize: the first AstroSciKu in the list of the three classified will receive a merchandising pack of the projects and public recognition of the author's ingenuity with the publication of the winner on social networks and the websites of the different projects involved in this activity.

Your participation in this contest implies that you accept all the competition rules.
